

The building blocks you need for a winning sportsbook

LIVE DATA SERVICE

WHAT IS THE LIVE DATA SERVICE?

Unrivalled data depth to support more betting markets

A sportsbook lives or dies on data. To cover a multitude of sports and markets, the data you use has to be accurate, rapid, secure and plentiful. That's exactly what you get with us.

For over a decade, our 11,500 scouts have been collecting more live data than anyone else in the business, across 35 data applications and feeds, covering more than 30 sports.

That all floods into an offering the gaming industry relies on: the Sportradar Live Data Service.

Welcome to the beating heart of live sports data.

Plus with our sister brand RTS, you'll get access to 50,000 extra unique matches, all under the same integration.

What to expect

Over 800,000 events a year - and rising

30+ sports and esports

Most events covered directly from the venue and delivered within two seconds

11,500 scouts, so you can trade practically any major live event in the world

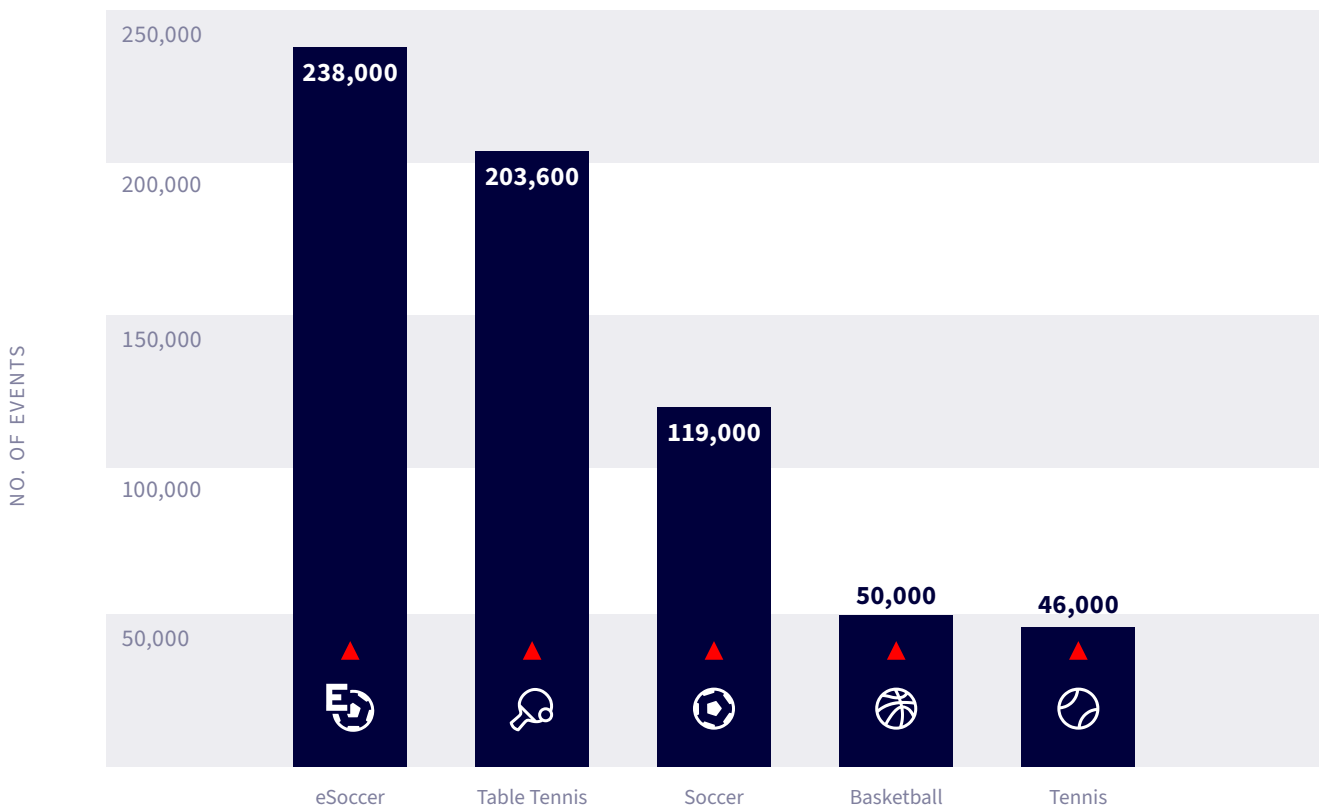

Data transmitted by our unique in-house apps means you're guaranteed accuracy and security

Choose from either our Live Data XML feed, tailor-made for your needs, or the Live Data Client, our web-based graphical interface

Projected 2024 coverage of table tennis, soccer, tennis, basketball and electronic leagues

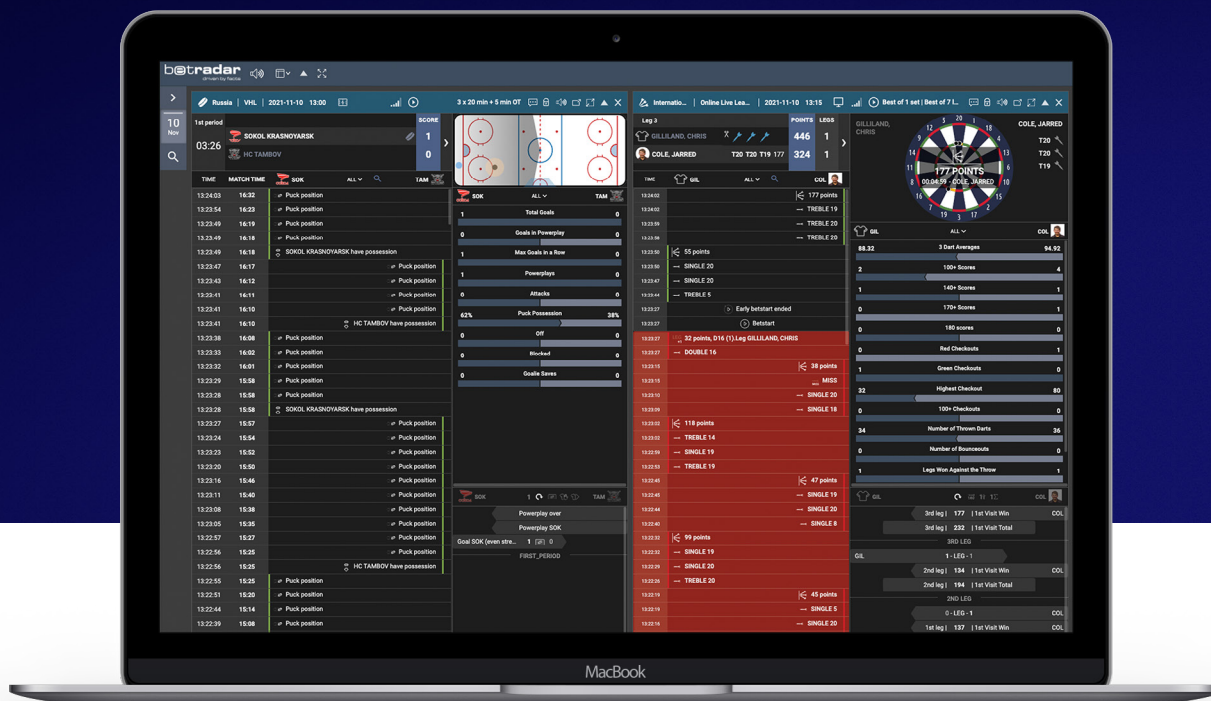

SPORTS COVERAGE

Live Data tracks over 800,000 events from the following sports and esports

 Aussie rules	 Darts	 Padel
 Badminton	 Dota (E-Sport)	 Rugby
 Bandy	 eSoccer	 Snooker
 Baseball	 eBasketball	 Soccer
 Basketball	 Field Hockey	 Squash
 Basketball 3x3	 Football	 Table tennis
 Beach Soccer	 Futsal	 Tennis
 Beach Volleyball	 Handball	 Volleyball
 Bowls	 Ice Hockey	 Water Polo
 Counter-Strike (E-Sport)	 Kabaddi	
 Cricket	 League of Legends (E-Sport)	

LIVE DATA CLIENT

Boost your in-play trading

Track a wide range of live match data, however you want. Get all the stats you need, right at your fingertips. Configure your interface or keep it the same across the board. Includes a live data XML feed to integrate a high speed data feed directly into your back end, so you can update one or more products in real time.

Widget features

Cater for every sport with three default sizes (Micro, Multi and Opti)

Resize your widgets, then save them to create your own default for each sport

Get clear game updates like possession, scores and cards

See details on current Betstatus, plus unusual statuses like Empty Net, Powerplay and Sin Bin clearly defined in the scoreboard

Switch the data client theme between low contrast (& limited colour change) and high contrast

What to expect

Use any desktop or mobile browser

Configure widgets by sport, depending on what you need and what space is available on-screen

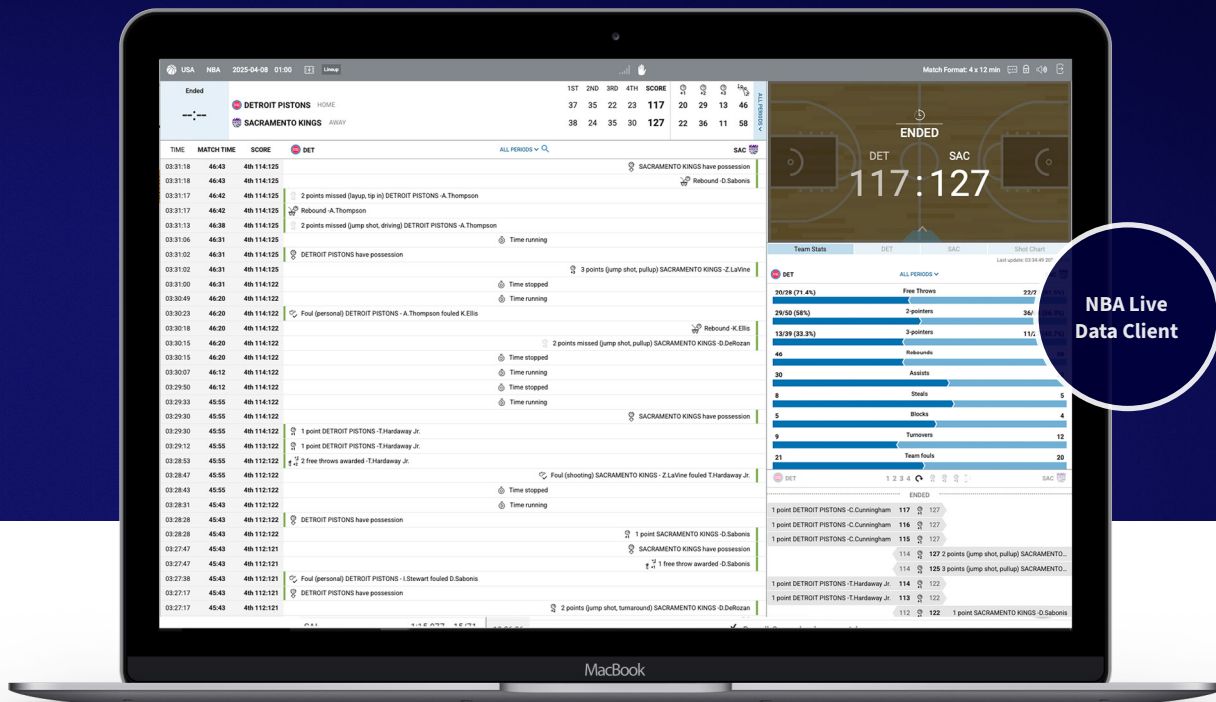

Highlight the moments that matter with colour-coded status changes

Get alerts for easy match trading

Analyse more deeply thanks to integrated stats and match timeline

DATA COLLECTION

Underpinned by the largest network of scouts in the world.

Every game produces thousands of data points. To collect them, you need two things: a highly qualified scout, and ultra-reliable software. We have both: which is why we're constantly setting, and pushing, the standard when it comes to selection, training and quality control.

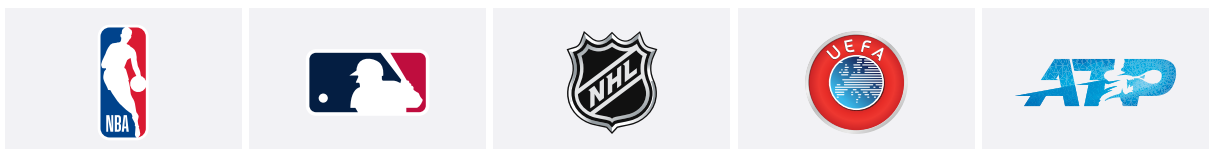

Sportradar Seal of Approval

- Applicants follow a rigorous training process
- Detailed guidelines and constant feedback during the training phase
- Stringent background checks with passport approval before application approval
- Detailed guidelines and constant feedback during training

What to expect

- Scouts are evaluated on their speed, accuracy and communication before, during and after each match
- A match without issues gets five stars (two stars for quality and three for security)
- Errors lead to fee cuts, suspension or termination
- Frequent re-training when it's needed
